Morpheus Photo Mixer™
The Premiere Digital Photo Compositing Software

Morpheus Photo Mixer is an easy-to-use compositing software that mixes up faces and body parts between two photos.

Bring Your Pictures to Life!
Place one person's head onto someone (or something) else's body or combine the funniest features of two people to create a hypothetical third person. Create hilarious photo mixes and share your wildest creations with your friends in seconds!

Get Wild!
• Stick your **husband's** face onto the body of your favorite pet or give him a more muscular body.
• Place the face of your wife onto the body of a ballerina or your pet cat.
• See what happens when you mix any two **celebrity** heads together.
• Surprise a **wedding couple** by mixing the faces of the bride and groom.
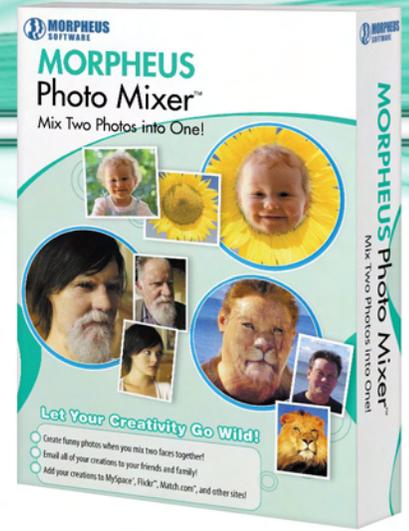

Features of the Standard Version

Easy to Learn and Use
• **Easy to use wizard** to help you get started creating photo mixes
• **Sample photo mixes** to play with
• A lightning-fast rendering engine for **previewing** photo mixes
• Exporting photo mix frames in still formats such as **JPEG, PNG, TIFF,** and more
• **Zooming** to any level for precision dot placement as well as mixing of large images
• A **timeline** window to quickly see a thumbnail of every photo mix

Additional Features of the Professional Version

More Creative Possibilities
The Professional edition lets you create **higher quality photo mixes**. All Standard features are included with the Professional edition plus additional features such as:

• Line tools, **transparency support**, and fade options used to create more **advanced photo mixes**
• The ability to mix pictures in some places and not in others
• **Customizable interface** including toolbars and window tabs
• **Skinnable windows** with a variety of skins to choose from
